EXPERIENCE

Trayt, Redwood Shores - *Software Engineer*

MAR 2017 - PRESENT

Trayt is a mobile app and a Sass platform that allows parents and physicians to make data-driven decisions to improve the lives of children with brain disorders.

Built a complex and stylish mobile app from concept to production.

Built a web portal for doctors to view the data logged in the mobile app.

Integrated with the Fitbit API to passively collect patient sleep and activity data.

Secured user data with iOS Keychain and implemented two factor authentication.

Wrote API endpoints and deployed backend code to Amazon EC2 instance.

Setup user analytics and frontend bug tracking to help us iterate effectively.

Developed a solid understanding of the entire systems development life cycle.
